## **INTRODUCTION: PROGRESSED CHART**

Your Personality Profile is revealed by the imprints of the planets in your NATAL Chart. The NATAL REPORT is a projection of "Personality Potential" and can be compared to a "Blueprint" of a building that is being planned for construction. At different stages of development while the building is being built, certain additions, deletions and/or other changes may become desirable (or even necessary) and the original blueprint may be modified to accommodate those changes. And so it is with your personality as indicated by your NATAL Chart. During the "building" of your life, your personality is being developed, and the imprints of the personality blueprint are being modified and/or changed, both by your own choices and by circumstances beyond your control.

The progression of the planets as they continue their respective orbits into different signs and houses, and the aspects they form, are beyond our control. But we DO have some control over how we handle these new influences, and how we let them affect our personality. In order to deal with these influences, it certainly would help for us to know WHAT these influences are, and WHEN we will have to deal with them. The PROGRESSED REPORT provides that information: the WHAT, the WHEN, and (in some reports) the HOW.

Now, for the first time, we have a Progressed Report that not only tells us WHAT, WHEN, and HOW--it also tells us HOW LONG! It locates the signs, the aspects, and the house positions for each of the planets for any given year of your life and tells you how long they will remain in those positions. With each of the interpretations for these progressed planetary positions, we include a brief synopsis of the influences and imprints of its position in your Natal Chart for your comparison.

Many techniques for following the development of man from birth through life have been devised and studied by Astrologers since about the second or third century BC. The technique used in this Report is called "Secondary Progressions". This system uses the "Day for a Year" process which appears to have been practiced since Ptolemy and Copernicus, and was supported by the German mathematician Johannes Kepler (1571-1630). The system is implemented by choosing a specific birthday. We then count a day for each year of your life, and cast a chart for the "progressed birthday".

The Progressed chart is the first chart used in Predictive Astrology, for it provides a good preview and overview of what you can expect in the coming year. We feel that the Progressed chart provides the first step toward using Astrology for a better and more fully informed way of living life -- AS IT UNFOLDS.

When combined with information obtained from a "FORECAST REPORT", OR "TRANSIT REPORT", which interprets the aspects of the transiting planets (where the planets actually WILL be at any given time), we can get an extremely comprehensive body of predictive information for any "progressed year"--and beyond. Check with your personal Astrologer for information concerning these Reports.

## YOUR PROGRESSED ASCENDANT

Like the Sun-sign, progressing the chart will change the sign on the cusp of the first house, your Ascendant. It will also bring influences of the new sign into play upon the personality in changing, modifying, and "blending" experiences. Each time a new sign "rises" on the first house, you may feel a little disoriented, especially during the first year or two. This is because different methods, or "styles" of operating in interpersonal and business transactions can vary considerably under the influence of different Rising signs. Since the Ascendant represents the face (the "Mask") we show the world, others may begin to see us in a different light before we become aware of any changes in ourselves.

Unlike the Sun's thirty-year cycle, the change cycles of the Ascendant may not be as predictable as the Sun, since the houses may have more, or less, than thirty degrees. Casting the chart for the place of residence instead of the birthplace can also affect the degree of the Ascendant. The exact time of changes from the birth chart Ascendant and from the progressed Rising-signs can be difficult to trace when changes of residence are extreme.

The Rising sign in the Progressed chart determines the signs on the houses, just as it does in the Natal chart. Each time the Ascendant changes, the sign on the cusps of the other eleven houses may change, also. The interpretations of the signs on the houses will give some clues regarding the affairs of each house during the year for which the Progressed chart is cast. These signs on the cusps may not change very much from year to year unless you move your place of residence a significant distance from one geographic location to another.

Your Progressed Ascendant is now at thirteen degrees of the sign, Virgo. The following interpretations are for the current year and place of residence.

**PROGRESSED VIRGO RISING WITH NATAL ASCENDANT IN CANCER**--Since the person with Cancer rising is ruled by emotions, the moody, changeable quality of this rising sign is apparent to everyone around. When in control of his or her emotions, this native is the most understanding, sensitive person you could hope to find--and, if not in control, the most miserable. To others you appear gentle and soft, but you can act rather reserved with them until you know them well and feel it is safe to be open with them. You have a strong need for emotional security and a sense of belonging, and are deeply attached to the past: your heritage, roots, family, cherished friends, familiar places, etc. Making radical changes or moving away from what is known and safe can be very painful and difficult for you. You tend to hold on to people and memories, as well as possessions of personal or sentimental significance. Having a home, a safe haven, is very important to you. Others see you as extremely caring. It makes no difference whether you are male or female, you are the Earth Mother. You ARE caring and nurturing. If you lack children of your own, you will find surrogate children or pets on which to bestow your maternal instincts. You are strongly attached to family and family traditions.

When the Ascendant moves into Virgo in the PROGRESSED Chart, the greatest shift in emphasis is from the Self to the JOB. Virgo is the sign of the workaholic. Order, neatness, and organization are vital to the Virgo's method of operation. You will notice objects in a room that others may not even know is there. You will be good at research and planning and you may seek jobs that require minute attention to detail. You will need to watch for the tendency to

overanalyze things during this life cycle. Relationships can be difficult because your expectations for perfection in others can be unrealistic. You could become so immersed in detail that you fail to see the overall picture. Because of the neat and orderly mind of the Virgo Rising, you may be quick to criticize those less organized. You may not realize how blunt or sharp you can be, and thus be totally unaware of your ability to hurt or wound--which you certainly don't mean to do. To you, facts are just naturally facts and everyone should know that. And you are not given much to pampering or coddling. You are not uncaring, so you need to be aware that your cool approach can come across like ice at times.

**PROGRESSED LIBRA ON 2ND HOUSE**--Venus, planet of beauty, art, and social matters rules Libra, sign of balance and fair play. When it is found progressed into the second house of finances, money is likely to be made through partnerships or joint enterprises. It could be through activities under the Venus influence, and more than likely through small business efforts during this time. You like nice things and may spend money, but you will also earn and save.

**PROGRESSED SCORPIO ON 3RD HOUSE**--Scorpio is a Fixed sign of the water family, ruled by Pluto, planet of power and regeneration. When in the third house of communications in the Progressed Chart, keen perception is present and satire is likely. You will have a quick wit, but may be prone to express it through sarcasm. There could be some difficulties with close relatives while Scorpio is on this house. Your business acumen could propel you into positions of power.

**PROGRESSED SAGITTARIUS ON 4TH HOUSE**--Jupiter, planet of expansion, rules Sagittarius. This Mutable, fire sign influences idealism and thrust. When it is found in the fourth house of home life in the Progressed Chart, we can expect pride of home and family. The home may be moved from the childhood location, and, possibly from the country. You will like nice things in the home, and will spend energy and money to provide them during this position. You could also enjoy finery for yourself.

**PROGRESSED CAPRICORN ON 5TH HOUSE**--Saturn, planet of discipline and limitations, rules Capricorn, an earth sign in the Cardinal mode--administrative, practical, persevering. When on the fifth house of love, romance, and creative expression in the Progressed Chart, the appearance could be cold and austere. Looks can be deceiving now, and could hide strong sex needs and desire. Expression can be very deliberate now. Gambling could be fortunate, however, during this progression.

**PROGRESSED AQUARIUS ON 6TH HOUSE**--Aquarius is an air sign in the Fixed mode. It signifies steadfastness, uniqueness, and strong social attitudes. Uranus, planet of ingenuity, sudden changes, and electricity, is the ruler. When found in the Progressed Chart on the sixth house of work, service, and health, you will like to do your work and to provide your services in your own way. You can usually get others to back you up. Your style can be unique, and you are likely to be original and inventive during this position. Avoid stress and overwork to protect from heart problems and stroke.

**PROGRESSED PISCES ON 7TH HOUSE**--Pisces is a water sign in the Mutable mode. It signifies receptivity and intuition. It is ruled by Neptune, planet of the visionary, the mystic, the occult. When progressed into the seventh house of marriage and partnership, you are likely to seek for the opposite to the Virgo rising in your partner or mate--the visionary, religious, mystic side of that person. If value judgments can be resolved while this progression is in the chart, this can be a powerful combination where one complements the other.

**PROGRESSED ARIES ON 8TH HOUSE**--Aries, the first sign of new beginnings, is ruled by Mars, planet of action and sexual energy. When this fire sign in the Cardinal mode is in the eighth house of needs, primal instincts and death, personal energy may overrule cooperation with others. Other's resources may be used up, and needs could be supplied primarily by your own efforts. You will be too busy to think about death, but accidents could intrude while Aries is here.

**PROGRESSED TAURUS ON 9TH HOUSE**--Taurus, sign of security and determination, is an earth sign in the Fixed mode. It is ruled by Venus, planet of beauty, art, social activity, etc. When this sign is progressed into the ninth house of recognition, philosophy, and higher mind, you are likely to appreciate dogma and the status quo. You will want to travel first class, and are likely to be recognized now by your expression of artistic achievement or endeavors.

**PROGRESSED GEMINI ON 10TH HOUSE**--This is the house of the career and Gemini is the house of the Twins--duality. It is ruled by Mercury--visionary, mystical, secretive. There could be a nervous restlessness while this sign is on the tenth house of the Progressed Chart. Any career activity here will move rapidly or boredom will set in. More than one skill can be required, or more than one profession may be followed during this time. It will be easy to do more than one thing at a time.

**PROGRESSED CANCER ON 11TH HOUSE**--This is the house of friendship, love received, hopes and goals. Cancer is a water sign in the Cardinal mode and influences emotions and security. It is ruled by the Moon, the most emotional planet. This sign on the cusp of the eleventh house of the Progressed Chart indicates strong emotional ties with friends. You may adopt a mothering attitude towards them now, and you will need to be careful to select a majority of friends who are stable and steadfast. You can be emotionally drained by friends through your own intuitive empathy, so you will sometimes need to keep a distance.

**PROGRESSED LEO ON 12TH HOUSE**--Leo is a Fixed, fire sign, ruled by the Sun. When it is progressed into the twelfth house of the subconscious and hidden matters, it can help to provide illumination into the dark recesses of the mind. You need time alone to explore the subconscious, and are likely to be attracted to things of the occult. Seek positive directions in occult studies during this time. You could have many sudden mystic insights now.

## **PROGRESSED SUN IN SIGN AND HOUSE POSITION**

The Sun moves forward (counter-clockwise) in the Progressed chart from its Natal position at the approximate rate of one degree for each year of life. This means that the Sun will progress into a different sign by, or before, age thirty. Remember that these Natal Sun-sign influences are with us all our lives in the form of birth imprints. In the Progressed chart, the new Sun-sign will influence, enhance, modify, and/or blend with those in the Natal chart--and so with any subsequent progressed Sun-signs. The influences may be most recognizable during the first year for which a Progressed chart has been cast after the Sun has moved into the next sign. Sometimes there can be events or situations which trigger significant life changes (relocation, graduation, job change, marriage, divorce, new home, etc.). Some of these could vividly high-light the influences of the Sun entering into a different sign.

As you read this report, look back over your life and try to remember if there were any events that could have changed your directions or goals when the Sun entered a new sign. You can count back to 00 degrees from the Sun-Sign degree of this chart to find the year, letting each degree count as one year. Allow about three years on either side of that actual date.

At the end of the thirty years that each new Sun-sign remains in the Progressed charts, the personality will have somewhat absorbed and assimilated the influences of all of these Sun-sign positions--and so with the new progressions to come. As in all Astrology, you have, and have had, free will to make choices. Those choices can be very significant in determining how much effect the Progressed Sun positions have in modifying your Personality Profile. Transiting planetary aspects to the Sun can also help you anticipate new influences and enhance the sense of timing. Hopefully, you will be able to make better life choices based upon an expanded base of information through astrology.

Your Progressed Sun is now in the twenty-eighth year of a 30-year cycle in the sign, Sagittarius. You have about 03 years left in this life-cycle.

**PROGRESSED SUN IN SAGITTARIUS WITH NATAL SUN IN SCORPIO**--Your NATAL Sun in Scorpio provides you with power, a strong will, and intense emotional desires. Your life is likely to be a constant struggle to conquer desire through creative use of the will. In all your endeavors, it is important that you embark upon the proper course from the start, since you will act with all your power. Your perfectionism makes it difficult for you to delegate responsibility, consequently you tend to overwork in order to achieve perfection in all details. Whatever you do, you do it with concentration and enthusiasm. You are extremely strong-willed and tenacious in pursuing your objectives. Fierce pride, courage, and emotional strength are yours in abundance. You tend to be more of a cynic than an idealist. You are secretive, and will demand ultimate loyalty from those in whom you may choose to confide. Your drive for material possessions may change later in life to a more philanthropic attitude, and a spiritual search may turn your philosophy of life completely around.

When the NATAL Sun in Scorpio moves into the PROGRESSED sign of Sagittarius, the higher influences of Scorpio are enhanced and intensified. Idealism will be increased, and a sense of being a part of the whole of humanity will emerge. You will become a more serious thinker, about the well-being of society as well as your own. You will begin to place your

spiritual laws and ethics above personality--even to the point of overlooking the personal side of your own life sometimes. You need to continue to nurture the personal ambitions of NATAL Scorpio through this progression, and continue to use its power in constructive ways. As under the Scorpio Sun, your expansive nature may take you to un-dreamed of adventures because of your desire to know, to experience, to try your wings, and to have excitement through exploration. You may travel far and fast, either geographically or in thought--or both. Your creative urge is strong, and you like to have people acknowledge your work and your creative achievements. The PROGRESSED Sagittarius Sun will help you to be a charming and agreeable companion, albeit highly independent.

**PROGRESSED SUN IN 4TH HOUSE**--The Sun in the houses represents the departments of life most strongly affected by the individual will and power potential. The house position of the Sun in the PROGRESSED chart is also very significant. Physically, the Sun rules the basic energy of the body as well as the energy of the psyche. Consequently, it can affect the physical and psychological vigor and enthusiasm with which we address the concerns of that house. In the fourth house, your concerns will focus upon your most intimate personal life and the people who affect it most. You will crave familiar surroundings and will feel the need for some kind of center or significant place where you can build a base for your activities. For most people, this indicates that the home takes on a deeper meaning. The attention will be focused inward in a psychological sense, for this is a time of subjective consciousness, of feeling exactly where you are with respect to the rest of the world, and of getting in touch with the very deepest levels of your feelings. Past events may come back to you through intense memories, or even through delayed consequences of past events that continue to affect you now. You may need to examine the past and the psychological consequences it still has on you, especially in the area of events involving parents or previous family experiences. You may find that the past has generated behavior patterns that are completely inappropriate for your life at this time, and that such patterns are a major source of tension for you. Psychological self-evaluation can be of enormous help to you in your personal growth during this Sun position in the fourth house of the Progressed Chart. Even if you have to get the help of a professional counselor to sort things out, it will be worth it.

## **PROGRESSED MOON IN SIGN AND HOUSE POSITION**

The close proximity of the Moon to the earth and its rotation around the earth causes it to pass between the earth and each sign of the Zodiac quite rapidly. It averages about thirteen degrees per day--a little less than three days per sign. Under the day-for-a-year progression system, it will take approximately thirty months, two-and-a-half years, for it to complete each life-cycle of the Moon.

The Moon is the only "planet" that could show up more than once in a Progressed chart in the same sign in which it was found in the Natal chart. Although these natal influences "imprint" our personalities and are with us throughout our lifetime, when the Moon appears in the same sign in the Progressed chart, it can give us an opportunity to modify even those natal imprints to some extent. In the delineations for the Progressed Moon-signs, we will include the Natal

Moon-sign interpretations.

In mythology the Moon is always female--as the Sun is always male. In most ancient cults and religions, the Moon represents the female force which reflects the male force of the Sun. There were many ancient Lunar holidays and festivals. In modern religion, the date for the Easter holiday is still determined by the Moon's orbit.

In astrology, "she" dispenses her influences indiscriminately upon male and female alike, though each sex is likely to respond to the influences in somewhat different ways. The Moon-sign influences in the Progressed chart will affect the emotional side of your personality as it was imprinted by the sign the Moon was in at birth and modified by subsequent progressed Moon-sign influences. The intensity of the changes can range from deeply sub-conscious to dramatically emotional.

Your Progressed Moon is now at 09 degrees of an approximate two-and-a-half-year life cycle in the sign, Leo. You should have, roughly, 22 months left until it moves into the next Moon-sign cycle.

**PROGRESSED MOON IN LEO WITH NATAL MOON IN LEO**--When the Moon has returned in the PROGRESSED Chart to the same sign it was in your NATAL Chart, all its influences will be restored, reinforced, and experienced all over again. However, it can offer you a limited opportunity to enhance those influences you consider most positive and to modify those you consider least supportive.

In the sign Leo in your NATAL Chart, the Moon indicates an emotionally proud individual with a flair for drama. You have an unconscious need to be admired and appreciated--and a conscious need for romance and affection. Your need to love and be loved is a healthy emotional drive which motivates you to continued self awareness and self-improvement efforts. You may occasionally have doubts about your own self worth, often interspersed with feelings of invincible superiority. It is the latter side that you are likely to show the public in order to protect your emotional vulnerability. You are extremely romantic and sexual, and intimate relationships are essential to your feeling of well-being. You love challenge, and the thrill of the chase could be more exciting than capturing the quarry. You are likely to place the love object upon a pedestal to admire and worship. You can be extremely loving and self-sacrificing in romantic relationships, but heaven help the partner who should fail to show appreciation. If a relationship should become stale and routine, you are likely to seek a new conquest. You are fussy about your appearance, and are likely to dress on the edge of avant-garde. Bright colors will appeal to you, as will sunshiny days. You like to feel bright, enthusiastic and up-beat. If you have a down day, you are likely to hide away and "lick your wounds". It would be advisable to avoid alcohol and other drugs to elevate your mood--they could prove to be too effective, with the risk of addiction. You are ambitious and have big dreams. Leadership roles come easy to you, and you do make a good boss. You are friendly, likeable, and do not fear the limelight. You may change jobs often, for the grass will always look a little greener on the other side of the fence. Your greatest goals may not be achieved because the glow and grandeur of gargantuan dreams could not sustain sufficient urgency for their fulfillment. You may dramatize your feelings and appear self-centered, but you are a sucker for flattery. A little praise will make your day. You will want your home to be a show place, you are well-groomed, and you want your family to be at their best. Also, you do need to watch for tendencies toward

inconsistency and stubbornness.

**PROGRESSED MOON IN 11TH HOUSE**--The Moon will pass through all the houses of the Natal Chart approximately every twenty-eight days, making its daily and hourly influences very fleeting. In this Progressed house however, the personality will be concerned with its reception by others. New objectives, hopes, and wishes will be formulated, likely with a spouse or very close friend. Friendships gained through the preceding periods will be strengthened and enhanced by deeper emotional feelings.

## **PROGRESSED SUN-MOON SIGN COMBINATION**

As in the Natal Chart, the blend of the Progressed Sun-Moon influences are extremely significant toward understanding the modification of the personality from that which was indicated by the Natal Chart. We urge you to review the interpretation in your Natal Chart. The interpretation of the Progressed Sun-Moon blend is printed next. Study it carefully, in addition to the delineations of Sun in Sign, Sun in House, Moon in Sign, and Moon in House. We suggest that you compare them also with the same interpretations in your Natal Chart.

**PROGRESSED: SAGITTARIUS SUN AND LEO MOON**--These are two fire signs trine to each other. Honor and ethics are likely to rule the life while this combination is in the Progressed chart. Loyalty and ideals will be at their highest. You are likely to take life seriously now, and expect that justice is your due. These positions attract applause and success. Your imagination and creativity can often take dramatic forms during this progression. Career could very well be in some field of the creative arts.

## **PROGRESSED MERCURY IN SIGN AND HOUSE POSITION**

Mercury in the signs gives clues to the kinds of concerns that occupy your mind and reveals your psychological approach to making decisions and conveying your ideas to others. Mercury influences the kind of communications you have with other people throughout the year: those received as well as those you send. It indicates shifts in mental focus and intellectual attention as they are impacted by the influences of the Progressed sign. It can also indicate travel, such as short trips which don't upset the daily routine too much. You can usually count on not being bored by Mercury influences, and the daily routine is more likely to be intensified rather than subdued. On another level, Mercury IS the every day routine, indicating everything we are so accustomed to that we don't even notice it. On still another level, it may indicate a time when you should just sit and think.

Mercury takes a little less than thirty years to progress through the thirty degrees of each sign,

so we may have a little "stretch" or a little "overlap" of influences when using the day-for-a-year progression system. We have tried to adjust the degree of Mercury in its current Progressed sign to give you some rough idea of how long it will be until it enters the next Progressed sign.

Your Progressed Mercury is now in the 24th degree of an approximate thirty-year life-cycle in the sign, Sagittarius. You could have, roughly, 07 years left in this cycle.

**PROGRESSED MERCURY IN SAGITTARIUS WITH NATAL MERCURY IN SCORPIO**--When Mercury is in Scorpio in the NATAL Chart, it gives you an intuitive mind capable of profound insights. You see things accurately, but not necessarily charitably. If you cannot express yourself openly, you will remain silent. You have much resourcefulness and a great determination of mind, and you can surmount obstacles that many would not attempt. You have good mental concentration and the ability to become completely immersed in your work. You seem to know things at an instinctive, nonverbal level and you prefer learning through direct experience or apprenticeship rather than through books or lectures. You have mechanical ability and can work well with your hands. You also have an instinctive rapport with animals, and may feel that you relate better to them than you do to people. You tend to become narrowly focused upon your own specialized interests and may not have much to say or communicate outside that field. Because of these self-directed interests, personal relationships may be difficult. You need to work on understanding and trusting other people, and on accepting others for who they are and where they are. Above all, learn to allow yourself to be "only human", also.

When Mercury moves into the sign Sagittarius in the PROGRESSED Chart, it influences your mind to focus on attitudes behind the facts. This kind of approach can give you great insight into social motivation and its subsequent events during this busy life cycle. The Scorpio focus on self will be somewhat moderated, and idealism and concern for the universal community will evolve. Goals and ambition will include more concern for the good of humanity, and the self interest of Scorpio will now develop into more concern for the public arena. Ambition and personal goals will gain some powerful incentive and achievement potential during this progression. You will be much concerned with education, especially in the fields of religion, philosophy, and law. You are direct in speech and will say exactly what you think. Existing personal relationships could be expanded and new ones possibly begun. Marriage is possible during this life cycle. Since your ideas are likely to be near the traditional now, you will be respected for your directness. You need to keep aware that facts are not always attitudes, so as not to confuse the two or ignore the facts.

**PROGRESSED MERCURY IN 4TH HOUSE**--Mercury in the houses deals with the practical affairs that occupy your mind, and shows what areas of activity will be influenced by your thoughts and communications. The fourth house position in the Progressed chart indicates that much of your thinking and learning will happen in your home. Even your business may be conducted from the home, as that is where the practical side of your mind is likely to be the most effective during this time. You may collect a large home library as your intellectual pursuits will be many. Your desire to constantly improve on your intellectual environment now may cause you to move often, possibly in mobile homes or trailers. Your communications center will revolve around your telephone, but you may choose a nomadic type of life while this progression is in force.

## **PROGRESSED VENUS IN SIGN AND HOUSE POSITION**

Venus in the signs indicates how you express your emotions in personal relationships. It also influences your attitudes toward money, personal possessions, creature comforts, and social and aesthetic values. Venus is a social planet, usually bringing people together for parties and good times. It is also the planet of LOVE, and its impressions combined with the influences of the signs can tell you quite a bit about your experiences in love and romance. It is also the planet of creativity: of artistic talent and entertainment. The influences of the different signs of the Zodiac can help to dictate the forms of expression indicated to display these talents.

The annual orbit of Venus is usually only five or six days away from the orbiting time of the Sun, so it fits the day-for-a-year progression system quite well. Though there may be a very little stretch or overlap, we are pretty safe in estimating a degree of progression per year for Venus, as with the Sun.

Your Progressed Venus is now in the 16th degree of an approximate thirty year life-cycle in the sign, Scorpio. You have, roughly, 15 years left in this cycle.

**PROGRESSED VENUS IN SCORPIO WITH NATAL VENUS IN VIRGO**--When Venus is in Virgo in the NATAL Chart, you are likely to over-analyze emotions and be very critical of those you love. You may be fastidious about your personal appearance, manners, and hygiene, which could be a cover-up for shyness and feelings of social and sexual inferiority. You may concentrate your efforts in Venus affairs into a primary professional life, in which you are likely to be very successful in accumulating material comforts. You are nurturing by nature and could be very effective in the human services professions. You are quietly devoted and faithful to your loved ones, but you may be timid about expressing too much sentiment or emotion. You are more comfortable showing love for someone by doing something for them, making something for them, or simply being there for them. This is probably because you underestimate your attractiveness and lovability, and you may doubt your own worthiness to receive love and appreciation. You tend to be very picky about trusting potential partners. You will need to be careful lest you set your standards too high and wind up living alone. Also, beware of the tendencies to OVER-compensate on your part (for feelings of inferiority) by seeking a bohemian lifestyle.

The Libra life cycle of Venus will bring relationships back out with other people and add influences for justice and fair play.

With Venus in Scorpio in the PROGRESSED Chart, the emotions and sexual desires can be strong and passionate, jealous and secretive, with much pride in sex and romance. You can take your romances too personally and too seriously, but you give much in emotional expression and expect much in return. You will become more assertive in relationships and more able to let significant others know what it is you want and expect. Love and romance will be on your own terms. If a marriage is in trouble now, it will either be revived according to your terms, or you will probably terminate it. Your artistic tastes are likely to turn to the dramatic and sensational

during this time. You are highly sensitive to others, and may be psychic. This progression gives you an intuitive mind capable of profound insights. During this period, you see things accurately, but not necessarily charitably. You will keep your personal pride and emotional dignity against all odds now, sometimes to the point of appearing cold and remote. You need to watch out for tendencies to control others in close personal relationships.

**PROGRESSED VENUS IN 3RD HOUSE**--Venus in the houses indicate how you express the Venus attitudes in the various areas of your life. When progressed into the third house it emphasizes an intellectual interest in artistic and cultural pursuits. This is also a pleasant Venus position for relations with neighbors and friends, short journeys, social activities, and correspondence. You are likely to have a special love for literature and poetry during this progressed position. You will communicate harmoniously, through both speech and writing, especially beautiful love letters and romantic poems.

## **PROGRESSED MARS IN SIGN AND HOUSE POSITION**

Mars is energy and action. "His" influences provide means of expression for the influences of the other planets through direct action. It can express temperament, set fire to the emotions, activate ambition, spur romance on, and sometimes set the stage for accidents. In mythology, Mars is the God of War.

It takes Mars an average of about twenty-two months to progress into a new sign, depending upon Retrograde movement, etc. Therefore it will be difficult to establish an accurate time frame for the duration of the Progressed Mars influences. We use two years as an approximation, but the length of time left in each sign cannot be very accurate. However, each time you have a Progressed chart cast, the position of Mars for that year will be accurate.

Mars is now at 15 degrees of the sign, Aquarius. It takes approximately 60 years for Mars to pass through one sign in the Progressed chart. You have, roughly, 32 years left until it moves into the next Mars life-cycle.

**PROGRESSED MARS IN AQUARIUS WITH NATAL MARS IN CAPRICORN**--When Mars is in Capricorn in the NATAL Chart, it channels great energy into professional ambition for the personality. Your actions are likely to be well organized and carefully calculated to achieve professional success. You will have an intense desire for status and recognition, and can be extremely materialistic. You need practical reasons for everything you do, so the energy you use is usually highly effective. You are likely to possess extraordinary self control and discipline. You have no sympathy for laziness and lack of ambition and you take pride in doing a job correctly. You need to balance your materialistic desires with understanding of human values and the consideration of others, lest you appear selfish, cold and calculating.

When Mars moves into Aquarius in the PROGRESSED Chart, your actions may be inspired by a superior level of intelligence. You will demand the freedom to do things in your own way. Your strong desire for independence may cause you to pursue unusual or unorthodox courses

of action during this time. Humanitarian work is indicated now, and you need to pay attention to health matters. You will learn from your own mistakes during this progression, but you do need to learn to practice teamwork and cooperation with others.

**PROGRESSED MARS IN 6TH HOUSE**--Mars in the houses indicates the departments of life in which you express your actions and desires. It shows where you need to use your energy and initiative to achieve the best results. In the sixth house of the Progressed chart, it indicates energy and skill expressed through work. You are likely to have extremely good mechanical ability as well as an excellent understanding of how mechanical things work. This includes the mechanics of the human body, for many great surgeons have Mars in the sixth house. If you work for others during this time, it will be extremely necessary for it to be a well-organized, efficient operation. Beware of perfectionism and over-concern for details--also for the tendency to overwork while Mars is in this house in the Progressed chart.

### **PLANETARY SIGN AND HOUSE POSITIONS:**

The rest of the planets take much longer to orbit through the signs and houses. Unless they were in the last few degrees of the Natal sign, Jupiter, Saturn, Uranus, Neptune and Pluto are probably still in the signs and houses they were in when you were born. If any of them have progressed into the next sign, the program will print the influences of the new sign as it compares to the old. It will only interpret the progressed house position. A major move in geographic location which changes the Ascendant may also change the house cusps and the signs on the houses.

**PROGRESSED JUPITER IN VIRGO WITH NATAL JUPITER IN VIRGO**--When the planet is in the same sign in both the NATAL and PROGRESSED charts the influences are the same, but are just more long-term.

Jupiter in the signs influences your ethical, religious, and philosophical standards and beliefs, and how you may express these interests. In the sign Virgo in the NATAL Chart, Jupiter imprints the personality with a cautious, analytical view of things. You will focus on the materialistic with prudence and discrimination. You will have a passion for details, but may need to practice looking at the broader picture. Honesty and integrity are the foundations of your nature and you will demand cleanliness and order in your activities. Your religious and philosophical interests will find their strongest expression in service to others, but high ideals will not fly unless they have a practical application. Avoid making moral decisions for others and trying to be all things to all people. Don't promise more than you can deliver.

**PROGRESSED JUPITER IN 12TH HOUSE**--Jupiter in the houses indicates the departments of life and the types of activity through which you express your philosophical, educational and religious ideas. This is a time, when it is progressed into your twelfth house, that your ego demands are not so strong. You are able to feel direct empathy for others and genuinely want to help. You can also learn much about yourself now without the usual resistance toward facing those hidden areas which you like the least. There is a great capacity for spiritual growth at the unconscious level. You may find a new spiritual teacher during this time, and you may play the teacher role for someone else. It is a good time to seek mystical knowledge which is usually hidden in the subconscious.

**PROGRESSED SATURN IN ARIES WITH NATAL SATURN IN ARIES**--When the planet is in the same sign in both the NATAL and PROGRESSED charts the influences are the same, but are just more long-term.

Saturn in the signs indicates the areas in which you must accept responsibility and the ways in which you must practice discipline and develop maturity. In Aries in the NATAL Chart, Saturn imprints the personality with determination, ambition, and a tremendous drive for success. You may be forced to develop your own resources, and, in so doing, you develop a strong will and strength of character. You will not like opposition and will be prone to anger easily. You will have a tendency to "go it on your own" during this life cycle. There is likely to be jealousy in partnerships, which can also cause difficulties in marriage. You will need to cultivate and practice the discipline of Saturn to counter the impulsiveness of Aries.

**PROGRESSED SATURN IN 7TH HOUSE**--Saturn in the houses indicates the areas of life in which we must learn to act with discipline and to express practical ambition through maturity. In the seventh house of the Progressed Chart, it gives you a strong sense of responsibility and justice in relationships and public affairs. During this period you will work hard and conscientiously with others. Partners, life companions, or spouses found during this time are likely to be much older or much younger than you, the older providing much stability to the relationship. You are reliable now in work, you honor your contracts, you may be interested in law, and you will have business organizational ability. Avoid allowing yourself to become inhibited, negative, and critical during this progression. Seek positive spiritual guidance and avoid alcohol and other drugs.

**PROGRESSED URANUS IN VIRGO WITH NATAL URANUS IN VIRGO**--When the planet is in the same sign in both the NATAL and PROGRESSED charts the influences are the same, but are just more long term.

Uranus in the signs indicates the ways in which you express your urge for freedom and individuality, and how you establish your link with the Universal Mind. When Uranus is in Virgo in the NATAL Chart, it imprints the personality with a mind that is subtle, independent, and original. You are quiet, but could be stubborn and curious to the point of eccentricity. You seem to naturally know how things work, and are especially attracted to the occult for your link with the Universal Mind. You can be successful in the fields of health, science, and technology.

Beware of erratic health problems, paying special attention to diet and mental control of bodily functions.

PROGRESSED URANUS IN 1ST HOUSE--Uranus in the houses indicates the type of activity through which you express your urge toward originality and freedom. Also through what circumstances sudden, unusual and exciting events may occur. Its progression into the first house indicates that old limitations you have placed upon yourself or accepted from others are no longer acceptable. You will feel that you need to change them, even if you have to break away from many of the things that have been important to you in the past. This could apply to a relationship, job, or any other area of obligation in your life. This is primarily a drive for freedom to allow you to set new goals, to grow and change, and to open yourself up for new experiences.

PROGRESSED NEPTUNE IN SCORPIO WITH NATAL NEPTUNE IN SCORPIO--When the planet is in the same sign in both the NATAL and PROGRESSED charts the influences are the same, but are just more long term.

LAST IN SCORPIO IN 1970-NEXT POSSIBLE IN YEAR 2133--Neptune in the signs manifests more historical and generational influences than personal. It indicates the kind of cultural expression shown by the imaginative and creative faculties of mankind over a given period of time. Your personal responses to Neptune in Scorpio in the NATAL Chart are likely to be in sexual areas and psychological areas of escape. Both the influences of the planet Neptune and the sign Scorpio are dual in nature: material and spiritual. It is difficult to function in both levels at the same time, and often at some time in the life, a metamorphosis is experienced when the philosophical and spiritual influences sublimate the materialistic.

PROGRESSED NEPTUNE IN 3RD HOUSE--Neptune in the houses indicates how you express your mystical potential, and may reveal some of the karma produced by your past actions. When it progresses into a different house, you have to be careful not to fall prey to mistaken illusions, for anything connected with the affairs of that house may seem to dissolve and pass out of existence in a subtle, most imperceptible manner. When it is in the third house in the Progressed Chart, Neptune can cause misunderstanding and garbled communications. The influences are also strong for deceit and underhand dealings. During this time you need to be "Perfectly clear" in all your messages, especially with loved ones. Watch out for manipulation from others. Make sure all mystical search is positive, avoiding questionable cults and forays into unproven occult practices. Always pray for protection in prayer and meditation, seeking positive guidance from your known Source.

PROGRESSED PLUTO IN VIRGO WITH NATAL PLUTO IN VIRGO--When the planet is in the same sign in both the NATAL and PROGRESSED charts the influences are the same, but are just more long term.

1957-1972. NEXT POSSIBLE, YEAR 2220. Pluto in the signs is also historical and

generational, but on the personal level it indicates permanent change. In Virgo in the NATAL Chart, it deals with work, health, and the practical application of technology. You are very organized and picky about details, especially where your work is concerned, and can be very capable of working alone. The areas of sex, drugs, and health are indicated as most likely areas for permanent change in your life. Seek guidance through prayer and meditation, striving to bring the feelings up from the subconscious into the conscious and practice good health maintenance.

When Pluto is still in Virgo in the PROGRESSED chart, the natal influences are enhanced and reinforced. The focus for regeneration is more likely to be outward rather than inward, and you may have more concerns about social and environmental issues. Do not neglect your own regeneration efforts, but keep practicing a healthy lifestyle. If Pluto is in this position in your Progressed chart, these influences will be with you for the rest of your life.

**PROGRESSED PLUTO IN 1ST HOUSE--**The house position of Pluto shows in which departments of life you need to exercise conscious creative willpower to regenerate yourself and your surroundings. In the first house of the Progressed chart, it enhances an intense self-awareness and the potential for developing a powerful will. You may have considerable initiative, but find it difficult to conform to traditional conduct and to cooperate with others, causing you to seek out an unusual kind of career. You need to regenerate yourself through a deep psychic understanding of life and consciousness, therefore you will need to practice positive prayer and meditation techniques. You are likely to have a highly developed sense of personal power and will during this progression, which you need to discipline in order to get along with other mere mortals.

### **PROGRESSED PLANETARY ASPECTS:**

Following are the interpretations of the Planetary Aspects of the Progressed planets to each other. As in the Natal chart we use only the major aspects: Conjunction, Opposition, Square, Trine, and Sextile. These interpretations may be a little different from the Natal Chart interpretations in describing the influences, as they are presented from the same point of view as transiting planetary aspects. Rather than natal imprints, these aspects represent influences you have to deal with during the time of this Progressed chart. Some of the slower moving planets with aspects in the Natal Chart may still be in orb. However the program allows less than one degree of orb, so that the influences will be strongly focused on the year for which the Progressed Report is prepared. Because of this narrow focus and the tight orb, there are not likely to be very many aspects (if any) in this Report.

The following progressed Moon to progressed planet interpretation will last about 2 months and it will occur about 6 months in the future, that is about 6 months after the date given on the cover page of this report.

PROGRESSED MOON OPPOSITE MARS--This aspect in the Progressed Chart brings developmental tensions to the personality. Experiences may project energies into impulsive reactions. It can indicate a time of potential disruption to growth harmony from intense emotional energy. Resolutions of problems and removal of obstacles should be approached with careful planning and timing. Try to avoid impulsiveness and confrontation.

PROGRESSED MOON SQUARE VENUS--This aspect in the Progressed Chart can bring concerns about finances and the standard of living (aesthetics) into sharp awareness. Personality and emotions are heightened, making judgments take on an emotional direction during this progression. Beware of the tendency for criticism in emotional relationships. Cultivate patience and practice serenity.

The following progressed Moon to progressed planet interpretation will last about 2 months and it will occur about a year in the future, that is about a year after the date given on the cover page of this report.

PROGRESSED MOON TRINE MERCURY--This aspect between the planet of emotions and the planet of intellect in the Progressed Chart can give you a good memory and a good working relationship between your conscious and your subconscious mind. It can enhance your conversational skills when in the Progressed Chart, and you are likely to be more interested in whomever you are communicating with. You can emotionally and logically understand and communicate the ordinary, daily life affairs, and probably have better business sense during this period than ever before. This is a rare supportive aspect.

PROGRESSED MERCURY SQUARE PLUTO--This transit can bring hidden forces to light and trigger psychological energies within that could change your life. Positive introspection can bring greater awareness and control of the inner dimensions of your being. On the other hand, it can cause compulsive thinking and a tendency to force your point of view on others. It is important to keep an open mind on all issues and not become obsessed with one idea or thought. You will not want to accept events at face value at this time, and it is a good time to study subjects like psychology, philosophy, mysticism, and the occult.

PROGRESSED VENUS SQUARE MARS--This aspect is about relationships, especially the physical side. It can contribute to the sexual intensity while it is in the Progressed Chart, but it can also create discord if there are any hidden tensions present. It is a good time for testing the relationship for tension and love energies. However, the difficulty is the square aspect between these two planets. Venus wants it nice and easy, and Mars can be very demanding. A reasonably healthy relationship should have very little difficulty, but one already in trouble could explode. It is not a good time to start a new relationship while this aspect is in the Progressed Chart, for it would no doubt be purely physical.

## **PROGRESSED TO NATAL ASPECTS**

The Natal Chart is always significant in our lives, and it must be taken into consideration when interpreting any of the advanced charting efforts. The Progressed chart has moved the planets into new positions, sometimes forming new aspects with the fixed positions of your natal planets. Some of the aspects in the Natal chart of the slower moving (outer) planets may still be in aspect orb in the Progressed Chart. These aspects, and any new ones formed, will help to bridge the gap between the Natal and Progressed Charts. Because the program allows less than one degree of orb in order to focus the influences for the year the Progressed Report is prepared, there are not likely to be many planets in aspect--if any. If there are any aspects in orb, their interpretations will provide valuable information about influences you will feel during the duration of this Progressed year.

**PROGRESSED SUN SQUARE NATAL URANUS**--This aspect can be disruptive. You can expect the UN-expected when it is found in the Progressed Chart, such as sudden upsets, sudden arguments and mechanical breakdowns. Relationships can be difficult. The Sun is illuminating Uranus's need for total freedom, and you will be bucking all restraints. Try to determine what is really bothering you, and begin to give it positive treatment. The energies of this aspect need to be discharged consciously. Without an outlet, they could turn back on you and cause the kind of behavior that could result in accidents.

**PROGRESSED SUN TRINE THE NATAL NORTH NODE**--This aspect confers leadership ability and indicates public favor and popularity. While in the Progressed Chart it offers the ability to exercise your will and express yourself in harmony with the prevailing social attitudes and institutions.

The following progressed Moon to natal planet interpretation will last about 2 months and it will occur about 6 months in the future, that is about 6 months after the date given on the cover page of this report.

**PROGRESSED MOON SQUARE NATAL MERCURY**--This aspect can be unsettling to the nervous system--the mind may become anxious with the emotional influences of the Moon. With this square in the Progressed Chart your concentration and communication can be difficult, and misunderstandings can arise. All mental efforts will be emotionally charged, but you should not hold back communicating them lest they get worse. Do not allow resentments to build up during this time, but don't avoid dealing with controversy by trying to change your own views to comply with others. Practice honesty in all confrontations during this time.

The following progressed Moon to natal planet interpretation will last about 2 months and it will occur about a year in the future, that is about a year after the date given on the cover page of this report.

**PROGRESSED MOON SQUARE NATAL NEPTUNE**--This aspect heightens the sense perceptions and dream activity. During this progression, you are likely to meet with unusual people. Awareness of the psychic is intensified, and you need to beware of the potential for self-deception, or of deception by others. Protect yourself through positive prayer and meditation against negative occult influences while this aspect lasts.

PROGRESSED PLUTO CONJUNCT NATAL PLUTO--During this time period you are likely to discover things you had not known about your family and ancestors, to gain greater psychological insight into yourself, and to develop a better understanding of the historical roots and unconscious motives of others. Although not obvious, all of these experiences are transforming you into a person who is different from what you were before this time period began.
